STRENGTH AND PRECISION IN EVERY PIPE

HEIDELBERG
S T E E L

COMPANY OVERVIEW

Understanding market needs and dynamics; Heidelberg steel was established with a vision to become the market leader in steel forming, equipped with 4 pipe production lines along with 2 slitting lines in 6th of October industrial zone with a total annual capacity of **60,000** tons with a stocking capacity of **15,000** tons of finished products. Heidelberg Steel is a full-fledged manufacturer and supplier of high-quality steel hollow sections with various shapes and dimensions which in turn make Heidelberg steel pipes suitable for different applications for industrial usage and construction implementation. Heidelberg steel is an ISO certified entity of 9001:2015, 14001:2015 and 45001:2018.

OUR VISION

To be the leading provider of steel hollow sections within the Egyptian and **MENA** markets. And driving innovation and sustainability in the construction and manufacturing industries and expanding our market share within our target markets.

OUR MISSION

To penetrate various industries and to offer high-quality precise steel hollow sections, easing customer's purchasing process and meeting manufacturer's production requirements.

OUR VALUES

Innovation:

Integrating up-to-date international manufacturing trends through capitalizing our experience and industrial knowledge. And at the same time creating new solutions for manufacturers and construction affiliates.

Teamwork:

Compounding and facilitating our staff experience and knowledge to excel our production capabilities and maximizing output.

Excellence:

Overseeing all production and commercial processes to ensure a high-end product and focusing on customer's needs to ensure maximum satisfaction.

PRODUCT CATEGORIES

AND TECHNICAL DATA

Heidelberg steel hollow sections are offered with a comprehensive range of hollow sections meeting industrial needs and serving the vast growing construction market, with a product lineup that includes circle, square and rectangle in multiple sizes and thickness and with a length of 6m with the ability to supply different length according to customer's needs.

All hollow sections are manufactured according to **BS EN 10219-2**, **EN 10305-3**, **ES 601** and **ASTM A53** making Heidelberg steel products applicable for various applications.
